

Keep Your Eyes on the Prize at Madison College

Eye care professionals, earn your Optometric Technician technical diploma completely online.

Continue to work and earn a living while your mentor trains you. Finish the program in two years as we prepare you to become a certified technician.

What to expect:

- » The curriculum prepares you for the technician certification examination (CPOT); after completing our accredited program, you are eligible to skip the first two examinations and jump right to the technician level examination
- » Having a national certification can make you more marketable, and eligible for career promotion and advancement
- » Expand your knowledge and master your skills
- » Improve patient care and office efficiency
- » Personal and professional growth
- » Master technical skills in eye pretesting, subjective refraction, slit lamp exam and tonometry

Focus on your future
