Higher Learning Commission
2016 Comprehensive Quality Review
Madison Area Technical College
Multi-Campus Evaluation Report

INTRODUCTION

As part of the *2016 Multi-Campus Evaluation Report* of branch campuses for Madison Area Technical College (henceforth, the College), the reader will, on occasion, be directed to information included in the *2013 Systems Portfolio*, the *2016 Systems Portfolio Addendum,* and the *2016 Highlights Report*. The latter two reports are filed concurrently with this report for the Comprehensive Quality Review site visit of March 2016.

OVERVIEW

The campuses included in this report are the Portage and Reedsburg campuses of the College District's Northern Region; the Fort Atkinson and Watertown campuses of the College District's Eastern Region; and the Commercial Avenue campus of the College District's Metro Region. The Commercial Avenue campus is not considered a "branch campus" by the Higher Learning Commission.

The HLC Comprehensive Quality Review team previously identified visits to the Portage, Reedsburg, and Commercial Avenue campuses as part of the College's Comprehensive Quality Review. As a result of that determination, this report contains select and applicable information about the Commercial Avenue campus, but not the other District Metro campuses.

OPERATIONAL GOVERNANCE

The operational governance and associated reporting structure of the College's Northern and Eastern Region campuses is centralized with the College's executives at the Truax campus in Madison. The Commercial Avenue campus does not have a separate administrative structure; it is an education facility in the Metro Region that hosts specific program and course offerings.

Regional Deans: The deans of the Northern and Eastern Regions are direct reports to the provost and serve on the Deans' Council with the deans of the College's six schools and the vice

provost. The deans of the six schools, and associated faculty, are responsible for program and curriculum design and development, course scheduling, and identification of learning objectives and associated assessments. Only a limited number of academic degree programs can be completed solely at a regional campus and those program offerings vary among the regional campuses.[1]

The dean of each region is responsible for hiring an associate dean, campus manager, and other clerical staff. The dean, via the associate dean, may also hire part-time faculty for courses. The regional deans have primary responsibility for conducting outreach with business and industry, K-12 school districts, civic organizations, and other community leaders in their region. The regional deans attend the District Board's monthly meetings and provide oral reports to board members on the activities and initiatives occurring in the regions.

Regional Services: The administrators and clerical staff in the regional dean's office report to the regional dean, the regional associate dean, or the campus managers. The student services staff members that work at the regional campuses report to managers in Madison that report to the vice president of student development and success. Beginning this spring, custodial and select maintenance staff members will be hired by and report to the regional deans, rather than reporting to managers in Madison that report to the vice president of administrative services. More complex maintenance projects at the regional campuses involving plumbing or electricity will be handled by either facility services staff from Madison or local contractors hired by the regional deans. This change in staff reporting was based on conversations between the regional deans and vice president of administrative services regarding the regional campuses' facility needs.

PLANNING AND BUDGETING

The planning and budgeting processes for the regional campuses are identical to those of other units of the College. The College's annual budget document for FY2015-16 contains a description of the College's budget development process and process for mid-year budget adjustments, if necessary. Section 2P6 of the *2013 Systems Portfolio* articulates the unit planning process.[2] With the introduction of a system of shared governance the budget process is evolving[3]. Section 4P5 of the *2016 Systems Portfolio Addendum* explains how the FY2015-16 budget process, the first involving

---

[1] Degree programs refer to one-year technical diplomas, two-year technical, and two-year associate degrees. Select certifications e.g., certified nursing assistant, also may be earned by solely attending a regional campus.
[2] As described in Section 2P6, the unit planning process was presented in relation to non-instructional units; the same unit planning process applies to instructional units.
[3] The *2016 Highlights Report* contains a detailed discussion of shared governance.

shared governance, unfolded as it relates to changes in personnel. In spring 2016, unit planning will occur for FY2017-18. Accompanying the change in the time of year for unit planning, previously done in the fall of the year, will be an effort to examine what elements will be required in unit planning for FY2018-19 and beyond.

As budget managers, the regional campus deans have a budget for the personnel and related supplies and services for their offices. The staff members located at the regional campuses that do not report to the regional deans engage in unit planning with their units in student development and success and administrative services. Those employees not reporting to the regional deans have accompanying budgets for their activities within their employment units.

The regional campuses do not separately retain revenues from the tuition of students attending a regional campus or other revenues e.g., a room rental fee paid for space at a regional campus. Those revenues, like all revenues, are deposited into the College District's General Fund or other appropriate District Fund as required by the Wisconsin Technical College System.

EDUCATIONAL QUALITY AND IMPROVEMENT

The responsibility for the process for improving educational quality resides with the Office of the Provost and the deans of the academic schools; it does not directly rest with the regional deans other than their hiring and support of regional part-time faculty. The school deans and the respective full-time faculty are responsible for ensuring that all programs and courses have the same rigor and outcomes across the College District. Sections 1P9 through 1P15 of the *2013 Systems Portfolio* articulate many of the processes related to improving the quality of teaching; detecting and addressing the differences in student learning styles; defining, documenting and communicating expectations for effective teaching and learning; building a course delivery system that meets the needs of students; and, ensuring up-to-date and effective programs and courses.

The *2016 Systems Portfolio Addendum* explains the work that has been undertaken related to identifying and assessing College-wide student learning objectives (the "Core Workforce Skills") and identifying and assessing program specific learning objectives. The *2013 Systems Portfolio* identified these as areas of improvement.

The *2016 Highlights Report* presents an overview of the new Academic Strategy and Analysis (ASA) unit and the academic program review process. The work of the ASA unit, program review process,

and plan-do-check-act methodology of identifying and assessing student learning outcomes are key efforts in improving the quality of the entire institution.

NON-INSTRUCTIONAL SERVICES

The College has processes in place for students and faculty, staff, and administrators at regional campuses to access non-instructional services.

Student Services: In many instances, a staff person is assigned to provide services to both campuses in the region (Northern Region or Eastern Region). The exceptions are academic advising where each campus has one full-time advisor and financial aid services in Reedsburg, where one full-time financial aid specialist serves students. The College provides the following student services at its regional campuses.

Enrollment Services
All enrollment functions (recruitment, admissions, enrollment, and records) are available at each campus via campus office staff. Financial aid and veteran education benefit issues are addressed by campus office staff. Those students presenting a more complex set of issues have those matters forwarded to financial aid staff in Madison via telecommunications.

Student Academic Support Services
Each regional campus has staff available to administer testing services. Additionally, there are staff available to assist students at each campus with using library resources and to provide tutoring services.

Student Development Services
Each regional campus has staff available to provide academic advising, counseling services, career placement services, and disability resource services.

Student Life – Activities/Events and Volunteer Experiences
Engagement teams exist at each campus. Staffing for activities and events is accomplished with student staff with supervision from the Office of Student Life in Madison and with a staff or faculty engagement team advisor at each campus. A Phi Theta Kappa (Honor Society) with its own campus student leader exists at each campus. Each campus also has a student representative serve on the College's Student Senate.

Administrative Services:

Facilities

The facility needs of the regional campuses are part of the College's overall facility planning efforts. The College's existing long-term Master Facility Plan from 2009 identified building expansion needs at each of the four regional campuses. Those facility needs were addressed with the proceeds from the November 2010 taxpayer approved $134 million referendum. The regular, on-going facility needs of the regional facilities are included in the College's annual maintenance plan and in the short-term three-year facility plan that is annually updated and submitted to the Wisconsin Technical College System.

Information Technology

The College plans for the technical infrastructure and IT security needs of all campuses through the Technology Services (TS) unit in Madison. Specific lab, classroom, and service area remodel and renovation projects identified and advanced through the Facility Services unit and associated processes involve TS staff and relevant regional campus staff. The hardware (e.g., desktops, laptops, and monitors) and enterprise software needs (e.g., Microsoft Office) of the regional campuses are addressed in accordance with the College's technology "refresh" policy. Regional campus students and employees may access assistance of the TS Help Desk via telephone or email for routine issues. On a rotational basis, TS field technicians travel weekly to each regional campus to assist with service and support coordination and issue resolution. When necessary, TS staff will travel to the regional campuses outside the normal, rotational schedule to address issues on-site. All campuses of the College have the same access to the primary data center in Madison via a high-speed network. Access to College services is also available to all employees from home or other places using various means, such as the virtual private network, through the Internet.

Public Safety

For emergency issues, the local police department or county sheriff is the initial responder to any incident that may arise. The regional management team works with the College's Public Safety staff to ensure local law enforcement are familiar with the facilities and that there is a coordinated response and agreed upon procedures for each campus facility in case of an emergency. Public Safety also provides education and training to regional campus administrators, faculty, and staff on preparedness issues e.g., what to do in case of an active shooter incident.

Human Resources

The deans, associate deans, and campus managers are supported in the hiring process by human resources business partners located in Madison. Human resources staff, on occasion, travel to the campuses to explain policy changes to managers and employees, provide updates about benefits, and to assess other needs that campus administrators may have related to their responsibilities. Other issues that employees of the regional campuses may have that involve the knowledge of or processes related to human resources staff may be resolved via phone calls or other scheduled meetings.

ATTACHMENTS

Overviews of the following campuses:

- Reedsburg
- Portage
- Watertown
- Fort Atkinson
- Commercial Avenue

Madison Area Technical College
Branch Campus Data
Northern Region - Reedsburg

Date of inception: First vocational classes began in 1977

Programs offered: See attached *Primary Program by Campus*

Enrollments for each program: See attached *Primary Program by Campus*

Projected enrollments for the next three years:

Year	Lower	Upper	Mean
2016	202.78	208.95	*205.86*
2017	204.52	210.70	*207.61*
2018	205.07	211.24	*208.15*

Number of full-time/part-time faculty assigned to Campus: Full-time Faculty = 10; Part-time Faculty = 69

Number of administrators on-site: Three*

Student services available at Campus: 4.75 FTE

Additional locations linked to the campus:
Sauk Prairie Village Dental (Madison)
