Your need for a skilled workforce increases with every technological innovation. Industrial and manufacturing settings are an important segment in our economy and your employees are critical to your success.

Develop and retain a workforce that delivers the competitive advantages your company demands. Through partnership with Madison College, your employees will receive customized training and technical assistance, increasing your ability to compete in the global arena.

Our practical courses cover a wide range of technical applications, including:

- Welding
- Blueprint Reading
- Manufacturing Standards
- Programmable Logic Controllers
- Robotics
- Technical Math
- Industrial Electricity and Controls

"The flexibility and ease of working with the Madison College staff was simply a pleasure. They took our ideas and willingly adapted any and all changes and suggestions that were thrown at them. In addition, they offered up many other curriculum modifications to help keep the interest of our employees and achieve our goals."

Kristi Ziegler, Director of Lean Manufacturing
