Connecting to Secure Wireless
Quick Setup: Android 4.0.3 (Ice Cream Sandwich)

1. On the home screen, select “Settings”.

The icon will look similar to one below:

![Settings icon](image)

2. Make sure the switch next to “Wi-Fi” is set to “ON”.

Select “MC-Secure”

![Wi-Fi settings](image)
3. Key in the following information:
   a. EAP method: PEAP
   b. Phase 2 authentication: MSCHAPV2
      Note: With some devices this may need to be set to “unspecified” or “none”. If authentication fails, try again after changing MSCHAPV2 to unspecified/none.
   c. Identity: Madison College username
      i. This is the same username you use to connect to Madison College email.
      ii. Only type in your username, not the “@MadisonCollege.edu” portion.
   d. Password: Madison College password
      Note: If you don’t get a screen that looks like this, go back to step 2, click “Add Network” in the top, right corner and then type in the above settings.

4. When your computer is connected, you will see “Connected” printed under the MC-Secure wireless network.
