Connecting to Secure Wireless
Manual Setup: Macintosh OS 10.8

Adding Wireless Network
1. Click on the wireless networks icon on the top of the screen near the right side.

2. Click on the “Open Network Preferences...”.

Madison Area Technical College
Libraries’ Student Computer Help Desk 4/11/2013
3. Click **Wi-Fi** in the left pane. Click the **Advanced** button.

4. If MC-Secure is displayed in the Preferred Networks list, highlight it and click the “-” button to remove it. Otherwise, hit the “+” button to add a new network.
5. In the “Add a Wi-Fi network profile” screen, fill in the following information:
   a. Network Name: MC-Secure
   b. Security: WPA2 Enterprise
   c. Username: Your Madison College username
      i. This is the same username you use to connect to Madison College email.
      ii. Only type in your username, not the “@MadisonCollege.edu” portion.
   d. Password: your Madison College password

Allowing Server Certificate

1. Double-Click on your “Macintosh HD”. Click on “Applications”, expand “Utilities”, and double-click “Keychain Access”.
