Connecting to Secure Wireless

Quick Setup: Windows 7/ Vista

1. The wireless icon is at the bottom, right of your screen, next to the clock. It looks like a staircase with a starburst in front of it. If you hover your mouse over it, you may get a bubble telling you that there are wireless connections available.

2. When you click on the icon, you will get a list of all the wireless networks available.
3. Click **MC-Secure**.

![Network Connections](image1.png)

4. Click on “**Connect**”
   
   *If you would like your computer to automatically connect in the future, check the “**Connect automatically**” box.

![Automated Connection](image2.png)
5. Type in your Madison College username and password; then click “OK”.
   a. This is the same username you use to connect to Madison College email.
   b. Only type in your username, not the “@MadisonCollege.edu” portion.

6. If you get a certificate error, you can click “Details” to ensure your computer is seeing the correct server.
7. Verify the details to make sure they give the following information:
   a. Radius Server: **NPS01.MadisonCollege.edu**.
   b. Root CA: **Entrust.net Certification Authority (2048)**

   Then click “Connect”.

8. Wait a moment while the computer connects.
