THE DIRECTIONS LISTED BELOW APPLY TO ALL HEALTH PROGRAMS – This form is to be completed no sooner than three months prior to the date you begin classes. All programs have agreements with affiliating clinical agencies which require verification of compliance with employee health standards. This form must be completed before you will be allowed to go to clinical affiliation sites. In many programs, clinical experiences begin within the first two weeks of school. If there is anything missing or incomplete from the form, you will not be allowed to attend clinical or continue with your program. Please attach all necessary copies of lab reports. You must make copies for your own records and will not be able to retrieve originals after submission to the School of Health Education office. Nursing Assistant students must submit forms and lab reports online at CertifiedBackground.com.

STEP ONE (COMPLETED BY STUDENT)
This side must be completed entirely. Health Insurance is required.

STEP TWO (COMPLETED BY HEALTH CARE PROVIDER)

MMR = Measles (Red Measles/Rubeola), Mumps, and Rubella (German Measles)
- The student must show two immunizations for the MMR (at least one dose after 1980).
- Without the immunizations, positive titers and detailed lab reports are required.
- With negative or equivocal titer results, two immunizations or a booster is required.

Varicella (Chicken Pox)
- The student must show two immunizations for Varicella.
- Without the immunization, a positive titer and detailed lab report is required.
- With a negative or equivocal titer result, two immunizations or booster is required.

TB Skin Test
- The student must have a current two-step completed when turning in the form. All detailed information of date placed/read and result is required.
- With a yearly TB – all detailed documentation of the current year TB plus the two previous years are required.
- With a Quantiferon Gold Blood test (QFT) – student must include negative lab result annually.
- TB testing must be administered yearly while in Health Programs, with updated reports brought to the School of Health and Safety Education office for student file.
- If Positive Test results, a current negative chest x-ray and lab report is required.

Tetanus/Diphtheria/Pertussis (Tdap)
- A student must have a Tetanus/Diphtheria/Pertussis immunization every ten years.

Hepatitis B Vaccine
- Students can start classes if the first of the three series is completed by the first day of class. The student will need to continue with the series throughout the program and documented updates must be delivered to the School of Health Education office for student file.
- Without the immunization, a positive titer and detailed lab report is required.

Influenza – Seasonal
- Some clinical affiliations may require students to have proof of seasonal influenza vaccine. Check with your program director for more details.

Health Care Provider Information
- A signature with date from the person performing the health screening is required along with all contact information. If the student has any sensitivities, restrictions, or has been treated for or has tested positive for any of the conditions listed on the form, they will need to inform their Program Director.
